About the Journal

The Journal is an International reviewed publication focused to disseminate theoretical or experimental novel information contributing to the understanding and development of agriculture, environment and biotechnology. The Journal recognizes the multidisciplinary nature of its scope and encourages graduate students, scientists, research scholars and government and non-government organizations employees the submission of research material from all of the disciplines involved in agriculture, environment and biotechnology. Contributions are welcomed in relation to the study of particular components of the agriculture (e.g., plant and animal), environment (i.e., soil, water, meteorological and climate) as well as biotechnology (e.g., crop and animal biotechnology) resulting interactions and their relationship/impact on society and environment at a local, regional or international level. Agriculture and environment interactions from the perspective of sustainable development and natural resources management studies are also welcomed. The journal is also focused to enhance the communication between the science community and biotechnological aspects for the well of human being.

International Journal of Agriculture, Environment and Biotechnology, quarterly journal, publishing original research papers, short communications and review papers on topics which include:

- Environment
- Botany
- Seed Science & Technology
- Plant Physiology
- Horticulture
- Genetics and Plant Breeding
- Soil Science
- Agronomy
- Entomology
- Microbiology
- Biotechnology
- Agricultural Economics
- Agricultural Engineering
- Animal Science

Authors can submit their scientific articles/research papers and review articles in **Electronic Media** in MS Office Compatible software to Email: ndpublishers@redifmail.com/gmail.com / amitavabhu@gmail.com

You can also submit your research manuscript online www.ndpublisher.in

**NAAS RATING** 3.9

**Abstracting and Indexing**

IJAEB (International journal of Agriculture, Environment and Biotechnology) is abstracted and indexed in following organizations.

- Connacyt, Mexico
- AGRICOLA
- Index Copernicus
- EBSCO Host Academic Complete Solution
- CAB International
- EBSCO Database
- Indian Citation Index
- Ulrichs Web Agriculture

Evaluation of Plaster of Paris and Some Fungicides for Management of Foot rot of *Amorphophallus campanulatus* Blume Caused by *Sclerotium rolfsii* Sacc.

*In vitro* Antibacterial and Synergistic Effects of Plant Extracts and Synthetic Antibiotic ‘Aztreonam’ Against Extended Bacterial Spectrum

**AGRONOMY**

Influence of Vermicompost application alongwith Nitrogen on Growth, Nutrients uptake, Yield Attributes and Economics of Rice (*Oryza sativa L.*)

Yield and Yield Attributes of Groundnut (*Arachis Hypogaea L.*) as Influenced by Organic Practices in Semi Arid Region

Efficiency of Halosulfuron Methyl (NC-319 75% WDG) on Weed Control in Sugarcane

Development of Profitable Integrated Farming Systems for Small and Marginal Farmers of Hyderabad Karnataka Region Under Irrigated Condition

**SOIL SCIENCE**

Uptake of NPK, Availability of NPK and Quality Parameters of Bt Cotton (*Gossypium hirsutum L.*) as Influenced by Different Bio-fertilizers and *In-situ* Green Manuring under Irrigation

**PLANT PHYSIOLOGY**

Effects of Temperature and Gibberellic Acid (GA3) on seed Germination of *Vicia sativa, Chenopodium album* and *Physalis minima*

**HORTICULTURE**

Influence of Pretreatments and Varieties on Biochemical Quality during Aonla (*Embllica officinalis* G.) Murabba Preservation

Screening of Rose Varieties Against Black Spot Disease and its Management in East Siang District of Arunachal Pradesh

Agriculture is one of the strongholds of the Indian economy, accounting for 15% of the nation’s GDP, about 11% of its exports, about half of the population still relies on agriculture as its principal source of income and it is a source of raw material for a large number of industries. As a matter of fact India has become the world’s largest producer across a range of commodities due to its favourable agro-climatic conditions and rich natural resource base. Further, accelerating the growth of agriculture production through a series of concerted and committed efforts is therefore necessary not only to achieve an overall GDP target of 8 per cent during the 12th Plan and meet the rising demand for food, but also to increase incomes of those dependent on agriculture to ensure inclusiveness.

After completing successful sixth year of publication of IJAEB, I would like to take this opportunity to thank you all for being involved in IJAEB. And you deserve all credit for sending us the best lot of your work. Further, I know that good reviewers have busy schedules with other professional responsibilities so I appreciate the effort you put into completing this challenging review. IJAEB rely on the advice of reviewers to maintain the highest quality of publication and this journal could not maintain its high standards without the help of all of you. Your active participation in IJAEB is highly appreciated and any suggestions to improve our activities are most welcome.

Sincerely

Amitava Rakshit, PhD
Institute of Agricultural Sciences, BHU, Varanasi, India
