	Important Terminologies	210
	Literatures Accessed	215

Preface

It gives me great pleasure to bring to you *Crop Science Tutor* – a comprehensive book designed to help the agricultural students to prepare for their examinations. It is an absolute conformity with the latest syllabus of the ICAR-UG and PG courses, and has been designed to cater to the requirements of the teachers and students. I have tried to awaken an interest in the subject by taking of the wonders of the theoretical and practical aspects of crop science. The aim has been to make the students aware of and sensitive to the fundamental nature of crops and their cultivation practices. I have tried to accommodate frequently asked questions (FAQs) on different field crops in the interviews of various agricultural examinations. This will definitely help the students to become interview-ready.

Efforts have been made to make this book as complete and accurate as possible. However, there may be errors in typography and content. This book provides information only up to the publishing date. Any comments, shortcomings and suggestions to further improve this book would be gratefully received.

I wish to express my sincere gratitude to New Delhi Publisher. I thank all the persons involved in making this book a reality. This book would not have been possible without their unstinting help at all stages.

Kalyani, West Bengal
